

BUSINESS REPORT

360-Education-Business-Analysis

01. Executive Summary

This business analysis project evaluates the operational and financial performance of 360° Education, an ed-tech and vocational training institution, across its 5 primary branches (Karve Nagar, Nagpur, Hadapsar, Pimpri, and Chinchwad). The institution generated 66M in Total Revenue from 2K Total Admissions across 5 specialized technical courses. Key findings reveal strong revenue generation in high-demand fields like Data Analytics (16M) and Data Science (16M), alongside robust candidate placements with top IT recruiters such as Wipro, Capgemini, Accenture, and TCS. However, the business faces structural bottlenecks: a low placement conversion rate of 34.85%, significant fee collection friction (14M in Pending Fees across 1K students), and a severe drop-off in admissions and revenues in May 2025.

02. Business Problem

360° Education operates in a highly competitive technical skill development market. Despite attracting leads and admissions, the management team faces critical operational challenges:

1. High Uncollected Receivables: 14M in fees remain pending across 1K enrolled students (approx. 21.21% of total revenue uncollected).
2. Suboptimal Placement Conversion: Out of 2K total students, only 697 students (34.85%) have been placed, creating candidate backlog and risking brand credibility.
3. Sharp Volatility in Monthly Performance: A severe decline in both revenue (dropping from ~ 4.0M to 1.8M) and monthly admissions occur toward May 2025.
4. Marketing & Conversion Inefficiencies: Lead conversion rate stands at 31.90% from 2K total leads (638 converted leads), leaving over two-thirds of top-of-funnel traffic uncaptured.

03. Dataset Overview

The dataset underlying this dashboard covers student enrollments, financial transactions, marketing lead metrics, and placement tracking from January 2024 through May 2025.

- Core Entities: Students, Courses, Branches, Payment Modes, Marketing Channels, and Hiring Companies.
- Primary Key Metrics:
 - Students & Admissions: 2K Total Students, 2K Total Admissions, 697 Active Students.
 - Financial Metrics: 66M Total Revenue, 52M Total Collected Fees, 14M Pending Fees, 33.00K Average Course Fee, 79.45% Collection Efficiency.
 - Sales & Marketing Metrics: 2K Total Leads, 638 Converted Leads (31.90% conversion rate), 18K Total Calls, 11K Effective Calls.
 - Placement Metrics: 697 Placed Students (34.85% Placement Rate), 6K Placement Calls Given, 5.24LPA Average Salary Package, 414 Students with ≥ 5 Calls.

04. Business Analysis

Revenue

- Total Revenue: 66M overall revenue generated.
- Monthly Revenue Volatility: Revenue averages around 3.8M – 4.8M per month through mid-2024 to early 2025, peaking at 4.8M in May 2024, but drops sharply to 1.8M in May 2025.
- Course Contribution:
 - Data Analytics: 16M (24.52%)
 - Data Science: 16M (23.92%)
 - Python Full Stack: 12M (18.62%)
 - Java Full Stack: 12M (18.30%)
 - Software Testing: 10M (14.64%)
- Branch Performance: Revenue generation is remarkably balanced across branches, led by Karve Nagar (14.2M), followed by Nagpur (13.7M), Hadapsar (13.1M), Pimpri (12.6M), and Chinchwad (12.4M).

Admissions

- Volume: 2K total student enrollments recorded.
- Course Distribution: Balanced student intake across all 5 key offerings:
 - Python Full Stack: 410 students (137 placed, 273 unplaced)
 - Data Analytics: 405 students (141 placed, 264 unplaced)
 - Java Full Stack: 403 students (139 placed, 264 unplaced)
 - Data Science: 395 students (136 placed, 259 unplaced)
 - Software Testing: 387 students (144 placed, 243 unplaced)
- Monthly Intake Trend: Steady intake averaging 110 – 145 students per month, peaking in May 2024 (146), followed by a sharp downturn in May 2025 (~50 students).

Marketing

- Lead Generation & Conversion: Generated 2K total leads, achieving 638 lead conversions (31.90% conversion rate).
- Tele-Sales Efficiency: Out of 18K total calls, 11K were logged as effective calls (61.1% effectiveness rate). Average revenue per admission stands at 33.03K.
- Top Lead Sources (by converted leads):
 1. LinkedIn: 123 conversions
 2. Walk-In: 105 conversions
 3. YouTube: 105 conversions
 4. Referral: 104 conversions
 5. Instagram: 103 conversions
 6. Website: 98 conversions

- Branch Conversion Lead Volume: Karve Nagar led lead conversions (146 converted / 430 total leads), followed by Nagpur (138 / 420), Chinchwad (138 / 378), Pimpri (110 / 381), and Hadapsar (106 / 391).

Financial

- Fee Collection: Total fees collected stand at 52M against 66M total booked revenue, representing a 79.45% Collection Efficiency.
- Outstanding Risk: 14M Pending Fees distributed among 1K students.
- Student Payment Status: Only 26.75% of students have fully completed their payment schedule, while 73.25% have pending balance installments.
- Payment Mode Preference: Balanced mode breakdown: Cash (26.86%), Cards (24.97%), Net Banking (24.29%), and UPI (23.89%).

Placement

- Overall Placement Rate: 34.85% (697 students placed out of 2K).
- Package & Hiring Activity: Average salary package is 5.24LPA. The placement team has arranged 6K placement calls, with 414 students receiving ≥ 5 interview calls.
- Placement Distribution by Course:
 - Software Testing: 37% placement rate (144 placed)
 - Data Analytics: 35% placement rate (141 placed)
 - Java Full Stack: 34% placement rate (139 placed)
 - Data Science: 34% placement rate (136 placed)
 - Python Full Stack: 33% placement rate (137 placed)
- Branch-wise Placement Share: Highly uniform performance across branches: Nagpur (21.66%), Hadapsar (19.80%), Karve Nagar (19.66%), Pimpri (19.66%), and Chinchwad (19.23%).
- Top Recruiter Placements: Wipro (296), Capgemini (293), Accenture (292), Tech Mahindra (274), Infosys (268), and Cognizant (260).

10. Dashboard & Visualization

The Power BI analysis suite is organized into 4 specialized executive views:

1. Executive Overview Dashboard: Features high-level KPIs (Revenue, Admissions, Placement Rate, Pending Fees), Monthly Revenue Trend, Revenue Contribution by Branch, Course-wise Revenue Pie Chart, Placement Status per Course, and Monthly Admission Growth.
2. Financial Analysis Dashboard: Highlights overall financial health, monthly fee collection trends vs. revenue trends, payment channel breakdown, installment completion ratio (73.25% pending), and course-level fee treemap.

3. Placement Analysis Dashboard: Dedicated placement funnel tracking 6K interview calls, active vs. placed student ratios, company-wise recruiter breakdown treemap, average CTC (5.24LPA), and branch-wise placement donut charts.
4. Sales & Admission Analysis Dashboard: Analyzes the full sales funnel (2K leads → 638 conversions → placements), lead acquisition channels (LinkedIn leading at 123), branch conversion stacked bars, and telephonic call conversion efficiency.

11. Key Business Insights

1. High Revenue Concentration with Uncollected Capital Risk:
 - While the institution generated 66M in Total Revenue, 14M remains pending across 1K students, representing an uncollected revenue rate of 21.21%.
 - 73.25% of all enrolled students have outstanding fee installments, while only 26.75% have completed their fee payments fully. This indicates a lack of enforcement around payment schedules during active course modules.
2. Placement Conversion Bottleneck Despite High Sourcing:
 - The total placement rate stands at 34.85% (697 placed out of 2K students).
 - Candidate sourcing is not the limitation: the placement team delivered 6K interview calls, with 414 students receiving 5 or more calls. The low conversion rate indicates candidate performance drop-offs during interview clearing phases rather than a lack of opportunities.
3. Digital Marketing Efficiency vs. Direct Sourcing:
 - LinkedIn is the single highest-performing lead channel with 123 converted leads.
 - Low-cost organic channels—Walk-Ins (105), YouTube (105), and Referrals (104)—perform almost equally well compared to paid social platforms like Instagram (103) and Website leads (98).
4. Balanced Regional Branch Demand:
 - Revenue is consistently distributed across all 5 branches, ranging from 14.2M in Karve Nagar to 12.4M in Chinchwad.
 - Placement share across branches shows uniform performance (ranging from 19.23% to 21.66%), confirming that training quality and corporate access are consistent across physical centers.
5. Course Profitability vs. Placement Metrics:
 - Data Analytics and Data Science are the highest revenue generators at 16M each (collectively accounting for 48.44% of total revenue).
 - Software Testing generates the lowest revenue (10M), yet achieves the highest relative placement conversion rate at 37% (144 placed).
6. Seasonal Drop in May 2025:
 - Monthly revenue dropped sharply to 1.8M in May 2025 (down from an average of 3.8M – 4.8M in prior months), coinciding with a drop in monthly admissions to ~50 students. This aligns with college semester exam schedules in Maharashtra, causing seasonal friction.

12. Business Recommendations

1. Establish Milestone-Based Fee Collection Gateways:
 - Enforce strict fee clearance rules linked to key academic milestones:
 - Milestone 1 (50% Payment): Mandatory prior to midterm evaluations / capstone project assignment.
 - Milestone 2 (100% Clearance): Prerequisite for scheduling placement calls and issuing completion certificates.
 - This directly targets recovering the 14M in pending fees and shifting the 73.25% pending student balance toward completion.
2. Shift Focus from Call Generation to Interview Readiness:
 - Since 414 students received 5 + interview calls without converting, mandate a 2-week Interview Prep & Technical Refinement Bootcamp for all candidates after their second unsuccessful call.
 - Focus on live coding tests, mock interviews, and communication training to boost candidate conversion rates beyond the current 34.85%.
3. Reallocate Marketing Budgets to High-Conversion Channels:
 - Increase marketing expenditure on LinkedIn ads and YouTube content marketing, which produce higher quality conversions.
 - Launch a structured Student Referral Program (e.g., fee cashbacks or course credits) to capitalize on the 104 conversions generated through word-of-mouth.
4. Introduce Automated & Discounted Payment Modes:
 - Implement automated monthly recurring payments (e.g., UPI AutoPay / NACH debit) to automate collection routines.
 - Offer a 5% upfront payment discount for students who pay 100% of the course fee at enrollment (33K avg course fee) to improve upfront cash collection.
5. Mitigate May Admissions Downturn with Early-Bird Campaigns:
 - Launch "Pre-Booking / Early-Bird" enrollment drives in February and March targeting final-year university students before their May exam period begins to prevent the steep drop-off seen in May 2025.

13. Business Priorities

Priority Level	Focus Area	Action Plan	Owner / Stakeholder	Target Metric / KPI
P1 (Immediate: 0–30 Days)	Fee Recovery & Access Control	Implement mandatory fee clearance checks before assigning placement interviews and releasing certificates.	Operations & Finance Team	Collect 50% (7M) of the total 14M pending fees.
P2 (Short-Term: 30–90 Days)	Interview Readiness & Upskilling	Conduct targeted mock technical interviews for the 414 candidates who have received 5 + calls without placement.	Training & Placement Cell	Increase overall placement rate from 34.85% to 50%.
P3 (Mid-Term: 90–180 Days)	Marketing Channel Realignment	Shift ad budgets toward LinkedIn and referral programs while optimizing call scripts for the telephonic team.	Marketing & Sales Team	Increase lead-to-enrollment conversion from 31.90% to 40%.
P4 (Long-Term: 180+ Days)	Course Portfolio Expansion	Expand capacity and batch sizes for top revenue tracks (Data Analytics and Data Science) across all branches.	Product & Strategy Team	Maintain sustained monthly revenue above 5M across branches.
